DETAILED ACTION

Response to Amendment

1. Applicants' amendment filed July 22, 2004 has been entered. Claims 1-23 have been canceled. New claims 24-37 have been added. Claims 24-37 are pending in the instant application.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Charles Gagnebin III on August 11, 2004.

The application has been amended as follows:

- claim 35 has been amended as follows:

35. (Currently Amended) A method of manufacturing a honeycomb structure comprising the steps of:

- a. providing a fiber fabric,
- b. impregnating the fiber fabric with a resin,
- c. making parallel cuts in a staggered configuration all through the resin impregnated fiber fabric,

d. stretching the fabric in a direction parallel to a surface thereof so as to form honeycomb cells in the positions that correspond to the cuts,

e. causing a plurality of expandable pegs to simultaneously penetrate into respective ones of the cells, each peg having a cross-section of size smaller than that of the corresponding cell, the pegs being mounted on a support plate and projecting substantially perpendicularly from the support plate, the pegs being mounted loosely on the support plate to allow a limited angular and lateral movement of the pegs relative to the support plate,

f. causing the pegs to expand so that they fill the cells and exert pressure on the inside faces of the cells,

g. curing the resin,

h. causing the pegs to shrink, and

j. withdrawing the pegs.

- claim 36 has been canceled.

Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance: the prior art does not teach or suggest a process for manufacturing a honeycomb structure including, providing a resin impregnated fiber fabric having a plurality of staggered honeycomb cells, providing a plurality of expandable pegs mounted on a support plate and projecting substantially perpendicularly from the support plate, causing the pegs to expand so that they fill the cells and exert pressure on the

inside faces of the cells, curing the resin, causing the pegs to shrink and withdrawing the pegs, wherein:

(a) said pegs are mounted loosely on the support plate to allow a limited angular and lateral movement of the pegs relative to the support plate; or

(b) applying a backing plate against the fiber fabric, said backing plate having holes in positions that correspond to the cells and to the pegs, such as to hold the fiber fabric between the support plate and the backing plate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stefan Staicovici, Ph.D. whose telephone number is (571) 272-1208. The examiner can normally be reached on Monday-Friday 9:30 AM to 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael P. Colaianni, can be reached on (571) 272-1196. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
